Before Use

- Remove all packaging including all protective plastic, from your Crosbys Waffle Iron
- Wash the plates then dry thoroughly
- Position on a flat surface
- Plug your Crosbys Waffle Iron into the mains
- The iron will now be ready to turn on

Operation

- Ensure the iron is plugged in and the power is on
- Select the temperature you require, the heating indicator light will be on
- The heating light will cycle on and off during use
- Once the iron has reached the desired temperature the heating light will go out and the green power light will come on
- Coat the plates with vegetable oil, then add the waffle mixture

Note: This unit has a re-set button on the base. If the temperature of the unit is too high, it will cut out. Please wait for the unit to cool down, press the re-set button and the unit will function as normal.

Cleaning & Maintenance

- Before cleaning disconnect the iron from the electricity supply. Whilst the plates are still warm wash them with warm soapy water and rinse with clean water
- All parts of the iron can be cleaned with a damp cloth
- DO NOT submerge the iron in water or use water sprays to clean it
- Always clean your Crosbys Waffle Iron daily, this will stop grease building up and becoming difficult to clean.
- Take care using metal utensils as they can damage the iron surface
